Education

California State University, Los Angeles Aug 2024 - May 2026

- Bachelor of Science in Computer Science
- Coursework: Web Programming, Artificial Intelligence, Data Visualization, Relational Databases, Human Centered Computing

Foothill College June 2021 - May 2024

- Coursework: Java, C++, Linux
-

Experience

Computer Science & WordPress Intern, HelpGuide.org Jan 2026 - Present

- Published and formatted articles in WordPress following accessibility and layout guidelines
- Maintained site quality by fixing broken links, layout issues, and formatting inconsistencies
- Assisted with UI/UX improvements and page structure updates

Software Engineering, NASA JPL / CSULA (Senior Capstone) Aug 2025 - May 2026

- Built a machine learning pipeline to detect lunar surface features from NASA LROC imagery
 - Implemented a dual-model detection system using YOLO and Detectron2
 - Processed raw image data into training-ready datasets and evaluated performance using precision, recall, and mAP
-

Projects

Full-stack Website

- Built and deployed a full-stack website using React, Django, PostgreSQL, and Docker
 - Developed REST APIs to dynamically render portfolio and resume content
 - Deployment with Nginx reverse proxy, Cloudflare, and a Linux server
-

Skills

Languages: C++, Python, Java, HTML/CSS, JavaScript/TypeScript, SQL

Developer Tools: Git, Linux, Tableau, MySQL, PostgreSQL, Docker, CI/CD, Spring Boot, React, Django
